<mailto:markmayercin@comcast.net>

A dynamic, talented professional, with a broad base of successful experiences in disposable and high-tech electronic medical device manufacturing. Extensive knowledge and abilities with internal and external calibration services, incoming and work-in-process inspection, internal and external audits, and regulatory body audits. Proven ability to develop strong business relationships and establish sound business practices. Successful in managing change and process improvements to develop timely and economical solutions to operational and organizational challenges. Excellent interpersonal, communication and analytical skills with a demonstrated drive, innovation and determination for results.

Experience

1987-2008

Olympic Medical Corporation, now a Division of Natus, Inc.
olymed.com

Senior QA Technician

- Manage receiving inspection of components, fabricated parts, labels, and materials. Train inspectors and coordinate/prioritize inspection activity to support Operations, Purchasing, Planning and Engineering as required.
- Measure incoming and in-process parts, 1st Article inspections; train inspectors to measure parts.
- Perform Product Audits and Audit reports; train inspectors to conduct product audits. Products include digital scales, phototherapy lights, procedure lamps, pasteurizers, cerebral function monitors (CFM), brain-cooling device (Cool Cap).

- **Employ sampling plan (ex.: MIL STD 105) for above activities.**
- **Corrective and Preventative Action (CAPA); Root Cause Analysis.**
- **Member Material Review Board (MRB) 1 of 7 members, including Production, QA, P&IC (Planning & Inventory Control), Purchasing, Engineering, Operations, . Process Non-Compliant Parts (NCP); generate report (NCR), tag and move parts to MRB area physically and with computer inventory transfer. Review items in MRB for disposition (rework, scrap, return to vendor, etc.)**
- **Manage calibration lab. Coordinate 3rd party calibration activities; maintain calibration files, EXCEL calibration database and review certifications. Perform in-house calibration of calipers, micrometers, height gages, etc.; 100+ annually/ semi-annually.**
- **Saved company \$10,000/ yr. by purchasing standards and doing calibrations in-house. Saved company \$1,500/ yr. and 1 week each turnaround time on crimper certification by changing from Sparks, Nev. cal. lab to Seattle cal. lab. Changed from UPS next day charges to no charge pickup and delivery.**
- **Drawing sign-off of all new drawings. Issue Engineering Change Requests, sign-off Engineering Change Orders. (ECR/ ECO).**
- **FDA Class III experience (cGMP). ISO 9001 experience. Company designated CSA Audit representative, quarterly audits.**
- **Electrical Safety Testing, Light output testing, Sound level testing, ESD testing, Spectrometer testing, Durometer hardness testing, Airflow testing, etc.**

1979-1987

Olympic Medical Corporation

Seattle, WA

Production Assembler/ Assistant Lead

Assembly, fabrication and testing of Medical Equipment-
Pasteurizers and Washers for Respiratory Therapy Equipment.

Education

1971- 1972 Ohio State University, Columbus, Ohio
South Seattle Community College, Quality Control Technology
Program was terminated 20 hrs. short of my Associate Degree.

Interests

Cooking, Vegetable Gardening, Guitar, Cinema

Tips

Good communication skills, verbal and written. Interface well with all other departments. Very adept at measuring parts, trouble-shooting part fit-up problems, product audit discrepancies. Adept at root cause analysis. FDA, ISO, CSA regulatory agencies that I have been audited by. I am a team player and I enjoy solving problems. I like to approach problems routinely, methodically and systematically.
